

Dear Facility Partners:

The Orange County/Long Beach Nursing Consortium is committed to developing collegial relationships between health care agencies and schools of nursing so as to work in a coordinated effort to address joint needs and pertinent current practice issues.

Monthly meetings are an opportunity for health care professionals to:

- Discuss current trends in nursing, new legislation, educational requirements and facility needs.
- Network between facilities and with schools.
- Disseminate information regarding health care issues.
- Facilitate joint planning for the use of clinical facilities for educational purposes.

Please see the attached OC/LB Consortium brochure for more information.

Time is precious and as people take on additional job responsibilities, attendance by facilities at meetings has declined sharply. The success of the Consortium depends on attendance and participation by both schools and facilities; therefore, we strongly encourage facilities to send a representative to participate in the OC/LB meetings on a regular basis.

The time that you give to this nursing community effort is greatly appreciated.
